Scoring Axesor

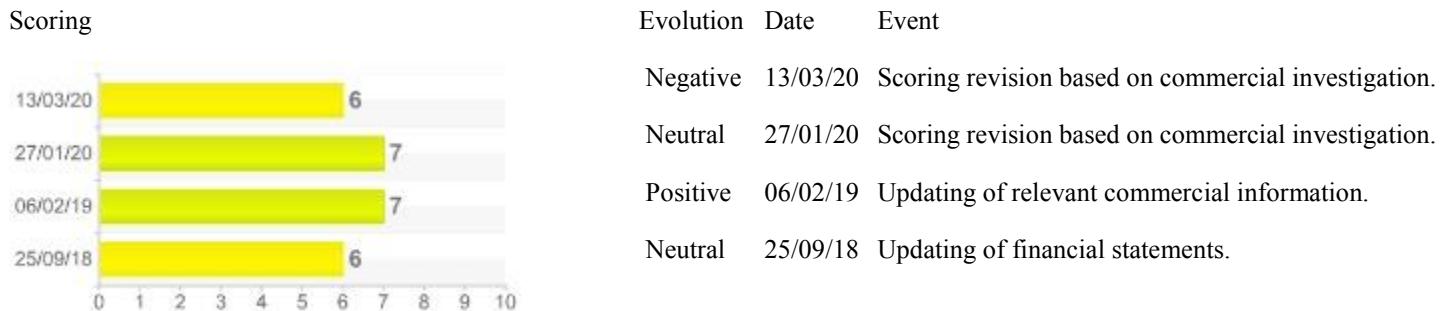

Scoring axesor:	6 /10		Risk Moderate	Evolution Negative
Adequate capacity to meet its financial obligations.				

> Basis for scoring

Positive Factors	Adverse Factors
No judicial claims have been detected in the Official Gazettes, regarding any Entity's outstanding debts with the Tax Bureau or Social Security administrations, as submitted by Courts of the various court jurisdictions.	SPAIN SL has a tight level of Financial Autonomy. The Internal Funds of the entity represent the 25.21% of the total amount of funding sources.
No irregular payment performance has been detected based on information obtained from credit bureaus.	The current debt represents a 46.06 % of the financial structure. In principle, a decrease in this ratio would indicate an improvement in the short-term financial situation.
SPAIN SL obtains economic profitability from the necessary investments in the development of its activity in comparison with its assets.	No Company's subsidiaries or branches are known.
High financial profitability. Net return from the company's main activity performed using its own equity is high. This income return has decreased in comparison with the previous financial year.	Although it is in a new stage of Consolidation it is part of a group distinguished by a downturn in the market.
Positive Working Capital The Company's Working Capital quality is significant, i.e. much of the Company financing comes from its equity. A structure is considered optimal if its liquidity level is slightly above its debt volume as a result of low idleness levels of its financial resources involved.	Private consumption continues to have, in spite of some signs of improvement, very low rates , thus showing great weakness.

TREND OF SCORING

> Latest Scoring Changes :

Probability of default

> Estimated Probability of Default for the next 12 months: 1.281 %

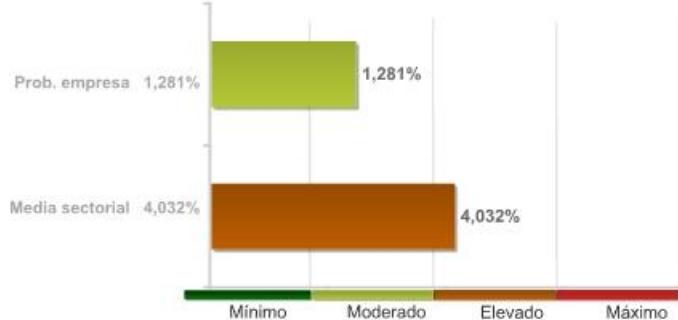

> Latest Scoring Changes:

Sector in which comparison is carried out:

463 Wholesale of food, beverages and tobacco

Relative Position:

↑ Credit quality is superior to that of other companies in the same sector.

The company's comparative analysis with the rest of the companies that comprise the sector, shows the company holds a better position with regard to the probability of non-compliance.

The 89.00% of the companies of the sector SPAIN SL belongs to show a higher probability of non-compliance.

The probability of the company's non-compliance with its payment obligations within deadlines estimated by our qualifications models is 1,281%.

In the event they fail to comply with the payment, the seriousness of the loss will depend on factors such as the promptness of the commencement of the charging management, the existence of executive documents which match the credit or the existence of guarantees and free debt assets under the name of the debtor. Therefore, the probability of non-compliance should not be solely interpreted as the total loss of the owed amount.

Recommended commercial credit

Favourable until **360.000** □ (Guideline value of outstanding commercial balance that axesor recommends be awarded to or maintained with the company queried)

Result of query submitted to the R.A.I. (Spanish Bad Debt Register) on
